

## Rieco-Titan Products Inc. has your resolution to the dilemma of replacing

**Atwood electric jacks**, which are out of production. Rieco Titan has jacks that can be used to replace obsolete Atwood components. You can literally remove a single malfunctioning Atwood jack and replace it with a Rieco-Titan jack.

**Rieco-Titan has an Atwood-compatible one-jack, two-jack or four-jack solution for those with Atwood jacks.**

The kit comes with a two-year warranty for the jacks and the electronics.

For best performance, Rieco-Titan recommends replacing both front, both rear, or all four jacks at the same time. That way they will raise and lower your camper at a more even rate.

## Furthermore, we also have an electric conversion kit for Atwood manual jacks.

The Rieco Titan Jack Electric Conversion Kit is a straightforward solution to upgrade your Rieco Titan or Atwood jack by converting it from a manual to an electric system. [This upgrade will facilitate the process of raising and lowering your customers' RV campers, resulting in a more convenient and efficient experience. Convert Atwood mechanical four jack system to an electric remote controlled system with the Rieco-Titan Electric Conversion Kit.](#)

## Rieco-Titan control boards also work with most Atwood corner jacks.

[The Rieco Titan Electronic Control Kit for Landing Gear](#) with White Receptacles is our Replacement Control Kit for Atwood Remote Camper Jack Systems, allowing you to control your Atwood jacks all at the same time. Built with the latest transmission technology, the controls ensure a secure and reliable connection between the control box and the wireless remote. Additionally, each jack connection is safeguarded by a 30-amp fuse, providing added protection against electrical overload and other potential damage.
